10 Scenario-Based HTML Assignments

Assignment Level	Good / Advanced Practical
Core Topics	Video • Audio • Iframe • Semantic HTML • HTML Entities • Previous HTML Concepts
Submission	10 separate HTML files
Deadline	Monday, 7 September, 11:59 PM

Objective

Create realistic HTML pages combining today's **video**, **audio**, **iframe**, **semantic elements** and **HTML entities** with all previously taught concepts: text/formatting, links/images, lists/tables, forms, input, select and textarea. Focus on meaningful structure, correct HTML, accessibility-friendly markup and realistic content.

Mandatory Coverage in Every Problem

- **Semantic HTML:** Use suitable header, nav, main, section, article, aside, footer, figure and figcaption where justified.
- **Multimedia:** Include at least one video, one audio element and one iframe. Use relevant valid attributes such as controls, muted, loop, width/height and title where appropriate.
- **HTML entities:** Use at least 8 meaningful entities naturally, including copyright, registered/trademark, ampersand, non-breaking space, less-than/greater-than, currency and mathematical symbols.
- **Previous concepts:** Demonstrate text/formatting, links/images, lists/tables and a realistic form using input/select/textarea.
- **Rule:** No CSS or JavaScript is required. Do not use tables for layout or generic elements when a suitable semantic element exists.

01 — University Digital Campus & Admissions Portal

A university wants a portal for prospective students to explore programs, campus life, admission information and application procedures.

- Use header/nav/main with meaningful sections. Use article for an admission announcement and aside for application guidance.
- Include headings, paragraphs, formatting elements, a student/alumni blockquote, images and useful links.
- Embed a campus-tour **video**, orientation **audio**, and an **iframe** for a map or university resource.
- Use ul for facilities, ol for admission steps and dl for Eligibility, Scholarship, Merit List and Application Fee.
- Create a program table with at least 6 rows, caption, headers, duration, eligibility, intake and fee.
- Use at least 8 HTML entities naturally.
- Create an Apply Now form with name, email, mobile, DOB, program select, qualification, suitable options, address textarea, consent and submit/reset.

Submission file: problem-01.html

02 — Corporate Careers & Recruitment Hub

A technology company needs a careers portal where candidates can explore jobs, company culture, benefits and recruitment stages.

- Use header/nav/main/section/article/aside/footer. Represent independent job postings as articles.
- Include company overview, culture, benefits, employee quote, links and workplace images.
- Embed a culture/recruitment **video**, employee **audio**, and an **iframe** for a map or professional resource.
- Use ul for benefits, ol for hiring stages and dl for Screening, Technical Round, HR Round and Offer.
- Create a job table with at least 7 roles: Role, Department, Location, Experience, Type and Closing Date.
- Use at least 8 HTML entities.
- Create a job application form with name, email, phone, position select, experience, location, portfolio URL, skills, resume upload if taught, cover letter textarea, consent and submit/reset.

Submission file: problem-02.html

03 — Travel & Tourism Destination Explorer

A tourism company wants a destination portal promoting attractions, experiences, travel information and visitor services.

- Use semantic header/nav/main/section/article/aside/footer and figure/figcaption for destination media.
- Create destination overview, attractions, travel tips, visitor information, useful links and images.
- Embed a destination **video**, travel-guide **audio**, and an **iframe** containing a map or suitable external resource.
- Use ul for attractions, ol for a one-day itinerary and dl for Check-in, Guided Tour, Local Transport and Travel Pass.
- Create an attraction table with at least 8 rows: Attraction, Type, Best Time, Duration, Entry Fee and Reference.
- Use at least 8 entities, including currency and typographic symbols.
- Create a trip-enquiry form with name, email, mobile, travel date, visitors, package select, preferences, message textarea and consent.

Submission file: problem-03.html

04 — Online Learning & Course Portal

An ed-tech platform needs a course landing page where learners can understand a course, preview lessons, see curriculum and register.

- Use semantic header/nav/main/section/article/aside/footer. Use articles for meaningful course/lesson content.
- Include course title, objectives, instructor information, formatted notes, quote, images and useful links.
- Embed a lesson-preview **video**, instructor **audio**, and an **iframe** for an external learning resource.
- Use ul for outcomes, ol for the learning roadmap and dl for Module, Prerequisite, Assessment and Certificate.
- Create a curriculum table with at least 8 lessons: Module, Lesson, Duration, Level and Assessment.
- Use at least 8 HTML entities.
- Create enrollment form with learner name, email, phone, qualification, course select, mode, schedule, goals textarea, consent and submit/reset.

Submission file: problem-04.html

05 — News & Media Digital Magazine

Create a digital magazine homepage for a media organization covering technology, business, sports, culture and breaking stories.

- Use semantic header/nav/main/section/article/aside/footer; each news story should be an independent article.
- Create featured story, categories, headlines, author information, quotations, images and navigation links.
- Embed a news-report **video**, bulletin **audio**, and an **iframe** for an appropriate external report/map/resource.
- Use ul for categories, ol for top-story ranking and dl for Editorial, Breaking News, Opinion and Sponsored Content.
- Create a news table with at least 8 entries: Story, Category, Author, Publish Time, Status and Reference.
- Use at least 8 entities including typographic/legal entities.
- Create newsletter/contact form with name, email, category select, frequency option, message textarea and consent.

Submission file: problem-05.html

06 — Restaurant & Food Delivery Portal

A restaurant group wants a website where customers can explore the menu, services, chef story and order/enquiry options.

- Use header/nav/main/section/article/aside/footer and figure/figcaption for food images.
- Include restaurant story, chef profile, offers, formatting elements, links and food images.
- Embed a kitchen/chef **video**, chef message **audio**, and an **iframe** for location/map or suitable resource.
- Use ul for menu categories/features, ol for ordering steps and dl for Dine-in, Takeaway, Delivery and Reservation.
- Create a menu table with at least 10 items: Item, Category, Type, Price, Availability and Description.
- Use at least 8 entities including currency and legal symbols.
- Create an enquiry/order form with name, phone, email, order type select, date/time, item/category, quantity, address textarea, instructions and consent.

Submission file: problem-06.html

07 — Real Estate Property Showcase

A real-estate company needs a property portal for a residential project with details, amenities, location, virtual tour and enquiry functionality.

- Use semantic header/nav/main/section/article/aside/footer. Each property/listing should be an article.
- Include project overview, amenities, location, formatted content, images, links and buyer testimonial.
- Embed a property-tour **video**, sales-agent **audio**, and an **iframe** showing the location/map.
- Use ul for amenities, ol for buying steps and dl for Carpet Area, Maintenance, Possession and Booking Amount.
- Create a property comparison table with at least 6 configurations: Type, Area, Bedrooms, Floor, Price and Availability.
- Use at least 8 entities including currency and suitable measurement/legal symbols.
- Create property enquiry form with name, email, mobile, property type select, budget, location, visit date, financing option, message textarea and consent.

Submission file: problem-07.html

08 — Banking & Personal Finance Education Portal

A financial-services organization wants an educational portal explaining accounts, cards, loans and responsible personal-finance practices.

- Use semantic header/nav/main/section/article/aside/footer; use articles for independent educational topics.
- Include educational text, notices/disclaimers, links, images, blockquote and formatting elements.
- Embed an educational **video**, awareness **audio**, and an **iframe** for a calculator/resource/map.
- Use ul for financial tips, ol for account-opening steps and dl for Interest Rate, EMI, Principal and Tenure.
- Create a comparison table for at least 6 products: Product, Type, Eligibility, Rate/Charge, Tenure and Benefit.
- Use at least 8 entities, including currency and mathematical symbols.
- Create callback/education-request form with name, email, phone, topic select, preferred contact method, date/time, question textarea and consent.

Submission file: problem-08.html

09 — Sports Academy & Tournament Portal

A sports academy wants a portal for training programs, coaches, tournaments, schedules, facilities and athlete registration.

- Use semantic header/nav/main/section/article/aside/footer. Use articles for tournament announcements or programs.
- Include academy introduction, coach profiles, training information, links, images and an athlete quote.
- Embed a training/highlight **video**, coach instruction **audio**, and an **iframe** for venue map or tournament information.
- Use ul for facilities, ol for registration/training steps and dl for Match, Fixture, League and Knockout.
- Create a tournament schedule table with at least 8 rows: Date, Time, Match, Venue, Category and Status.
- Use at least 8 entities including multiplication and legal/typographic symbols.
- Create athlete registration form with name, email, mobile, age/DOB, sport select, category, experience, contact details, goals textarea, consent and submit/reset.

Submission file: problem-09.html

10 — FINAL CHALLENGE: National Tech & Career Expo Portal

Build a complete portal for a large technology and career expo where students explore companies, workshops, speakers, schedules, resources and register.

- Use complete semantic structure: header, nav, main, multiple sections, independent articles, aside, figure/figcaption and footer.
- Create event introduction, organizer message, speaker/company information, formatting, blockquote, images and extensive links.
- Embed an event/highlight **video**, organizer/speaker **audio**, and at least one useful **iframe** such as a venue map or external resource.
- Use ul for preparation tips, ol for attendee journey and dl for Career Expo, Internship, Placement, Workshop, Certification and Networking.
- Create a participant/company table with at least 10 organizations: Organization, Sector, Opportunity, Eligibility, Location and Reference. Create a separate schedule table with at least 10 sessions.
- Use at least 12 meaningful HTML entities.
- Create a complete registration form with name, email, mobile, qualification, specialization, attendee type, sector, company/session select, experience, resume upload if taught, questions textarea, privacy consent and submit/reset.
- Demonstrate strong semantic decisions throughout: independent content as articles, supporting content as aside, navigation as nav and primary content as main.

Submission file: problem-10.html

Final Submission Checklist

- Every problem contains video, audio and iframe.
- Semantic elements are selected for meaning.
- HTML entities are used naturally.
- All previous concepts are integrated.
- Tables contain genuine structured data with captions/headers.
- Forms use labels, suitable controls, select/options and textarea.
- Images have meaningful alt text and links are meaningful.
- No CSS or JavaScript is required.
- No tables are used for layout.
- HTML is properly nested, indented and readable.
- Files are named problem-01.html through problem-10.html.
- Deadline: **Monday, 7 September, 11:59 PM.**
